ALEXANDER'S FLOWER SHOP

COMPLETED early last Summer and located on Route 28 about four miles south of Middleboro on the Cape Road, my new Flower Shop supplies a much needed addition, and affords me the opportunity to give you service the year round. During the cut-flower season, my Flower Shop will be open continuously from seven o'clock in the morning until ten o'clock each night seven days a week, and on Monday morning it will open at six-thirty. Fridays, Saturdays, and Sundays it will be open until mid-night.

While my Gladioli and Dahlias were in blossom, this past Summer, I had an out-door Flower Show that was kept continuously attractive and which displayed from twelve thousand to twenty-five thousand blooms at one time. To my knowledge it was the greatest continuous out-door Flower Show in the world, starting in mid-July and lasting every day and every night until the flowers were killed by frost October eleventh,—fourteen weeks of gorgeous blooms. In the evening the out-door show was particularly beautiful and brought forth exclamations of wonder and delight from passers-by.

In addition to the out-door show, my Flower Shop was kept filled with fresh cut flowers, as they came in from my gardens, ready for sale to customers. Here, flowers of many of the finest varieties in the world were sold daily at my regular price of fifty cents per dozen.

An additional feature inside the Flower Shop was an exhibit of all the varieties of Gladioli and Dahlias which were in blossom. I displayed these, so that customers who desired to make their bulb selections from the blooms, could compare the various colors and shades and more easily make their choice than from a catalog. Orders were booked and kept on file by me for delivery at planting time—thus saving my customers the trouble of keeping track of a list or a checked catalog, both of which are apt to be mislaid before another season. A selection made directly from the blooms is so much more satisfactory than a choice made from the catalog in the Spring, that I want to urge you to plan to visit my Flower Shop and take advantage of my displays which are complete and continuous, and which consist of the newest and rarest creations as well as the cream of the older favorites. Orders can be booked at any time during the day or evening.

The Flower Shop also has ample room to accommodate besides the Show room,—my main office, private office, cutting room and rest rooms. My office and salesroom is open the year round.

To give you an idea of the size of my out-door Flower Show will say that the piazza which covers the flowers is seventy feet long and forty feet on each side, making one hundred and fifty feet of flowers, ten feet wide, from the ground level to the roof.

You are most cordially invited to visit my Flower Shop as often as you can, and to bring your friends along. All are welcome at Alexander's.

DURING the Spring, Summer and Fall or until December my Flower Shop is open seven days each week for service.

In the Spring, your orders for bulbs, seeds and plants can be taken care of whenever you call, or can be ordered for shipment at a later date. My complete salesroom and packing department are now transferred to the Flower Shop, as well as the office—making it possible to handle all business conveniently under one roof.

MY TRIPLE GUARANTEE

Every bulb and plant I ship you is

- (1) Guaranteed to arrive in good condition.
- (2) Guaranteed to be true to name.
- (3) Guaranteed to grow.

If any Plant or Bulb you purchase from me fails to live up to this guarantee, replacement will be cheerfully and promptly made without expense to you.

Tuliptime in Dahliatown

“NEW ENGLAND’S FINEST OUT-DOOR FLOWER SHOW”

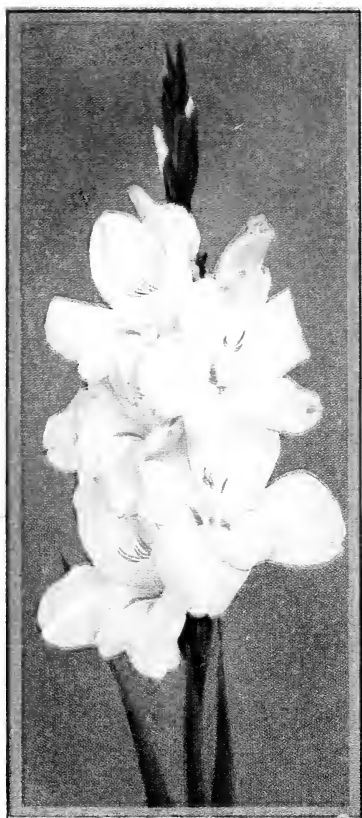

You are most cordially invited to visit my gardens this Spring while Dutch Bulbs are in blossom. Thousands of beautiful Darwin, Breeder, Single Early, Double Early, Rembrandt, Parrot, Lily-flowered, Specie and Triumph tulips are planted in my exhibition beds around the Flower Shop. Also you can see 18 varieties of rare Scillas, 5 varieties of Muscari, 4 varieties of Chionodoxa, 5 varieties of Fritallaria Imperialis, 2 varieties of Fritallaria Meleagris, 5 varieties of Ixias, 10 varieties of Crocus and 12 varieties of Hyacinths.

Orders can be booked, while you have the splendid opportunity to compare colors and to choose your favorites. Shipment of bulbs will be made at the proper time to plant in the Fall.

GLADIOLI

DURING these last few years I have increased my Gladioli planting so rapidly that I now have one of the finest collections of Gladioli in the world, as well as one of the most extensive plantings. My collection includes the very latest and best, the finest new creations, all the very largest of recent production, as well as the cream of the older favorites. By devoting my entire time to growing bulbs, and studying their requirements carefully since childhood, I have acquired valuable knowledge on the production of bulbs. The combination of the practical knowledge gained thru years of experience, and the course in scientific horticulture at the University, plus a trained ability to select characteristics that show improvement, has made it possible to apply myself to bulb production, to the advantage of both my customers and myself.

A thorough understanding of fertilization and soil requirements has been a great help, and insures my customers that the bulbs I send to them are the best bulbs that can be produced. They are strong, healthy and full of vitality, plump high crowned corms (bulbs) that have considerable stored up food. I am constantly aiming to produce the best that can be developed in bulbs, and my prices are as low as is consistent with this quality bulb. All prices on Gladioli quoted are for mammoth sized bulbs, unless otherwise specified, and as these are larger and stronger than offered by many growers they are guaranteed to give excellent results. The medium sized bulbs quoted in many instances are the same size as offered as the largest size by many growers. All of both medium sized and mammoth bulbs are sure to bloom the first year. Any Gladioli bulb that fails to grow will be cheerfully replaced without expense to you. I make this guarantee because I am sure of the quality I can supply, and from past experiences know they give perfect satisfaction practically 100%. If you have never grown my Gladioli, a trial order will prove my statements convincingly, I assure you.

New and Rare Gladioli

It is my aim to possess the very finest Glads that are developed, and as new ones are created, I test them out thoroughly, adding only the most exceptional each year. This year's collection of new creations includes only the largest flowering varieties, producing the very longest spikes, and the most gigantic flowers. Each of the following are exceptional creations, and as the amount of stock now available is very limited, would suggest that you place your order for any in this collection of new creations as early as possible, that you may not be disappointed. This collection includes the very finest creations from all parts of the world. In addition to securing Glads from all over the United States, I have imported them from Holland, Scotland, England, Germany, France, and far off Australia, that my collection will be the most complete and include the very largest and rarest varieties.

A. E. KUNDERD. Immense salmon-rose, with dark blotch. 3 for 40c, 6 for 75c, \$1.50 dozen.

so far developed, highly recommended. 75c each, 3 for \$2.00, \$7.50 dozen.

MRS. LEON DOUGLAS. Truly an Aristocrat, the giant of the Gladioli family, its remarkable flowers growing from four to six inches across, and produced on an enormous spike. Hemerocallis—Day Lily

Much attention has been paid of late to improving the Day Lilies, and now a proper selection of varieties will enable one to have them in flower the greater part of the season. They are very decorative, with their ribbon-like foliage and their beautiful lily-like flowers, especially when grown in clumps at prominent places in the border. The pale lemon types are lovely with light blue flowers such as *Belladonna delphiniums*, and soft magenta or mauve tones find a happy combination with them. The richer yellow flowers give opportunity for combinations with darker blues and purples, as well as bolder, tawny flowers. They are very hardy, very persistent, and make permanent borders when established.

FESTIVA MAXIMA

PEONIES

The Peonies are among the noblest and most magnificent of our herbaceous plants. They are the "Queen of Spring Flowers," and are well adapted for massing in beds, and particularly valuable for planting in groups throughout the perennial or shrubby border, where their brilliant hues add beauty to the entire surroundings. Their requirements are simple—a good rich, deep soil; they are perfectly hardy, and produce their wealth of flowers in great abundance.

TIME TO PLANT. Peonies may be planted with perfect safety any time from the middle of August till the ground freezes in the Fall, and in the early Spring until growth has advanced too far. September and October even as late as the ground is kept open is the best time, as they then make a root growth before Winter sets in, usually blooming the following Spring.

After being transplanted, Peonies will not produce typical blooms the first season, many fine double varieties throwing single or semi-double flowers, and it is not until the third year that the finest blooms are produced.

They will abundantly repay good care and nourishment; but they resent an over abundance of fresh manure too near the roots. Well decayed manure is far better. A division of the clumps at long intervals, when they become so crowded as to interfere with freedom of bloom; and the soil kept loose and free from weeds, is all that is necessary. Where grown for cut flowers, they should not be disturbed oftener than is necessary; where they are grown for the sale of roots, they may be divided every second or third year. Plant so the eyes will be from two to three inches below the surface. Lay roots flat. Do not stand them on ends.

RARE JAPANESE PEONIES

These "Wonderful Glowing Suns" as they are termed are entirely distinct from any other type of Peonies, resembling the Single Peonies, but with an additional development making the stamens either crowned with gold, or transforming them into more elongated petaloids of the same color as the outer single petals, tipped gold. They are as yet comparatively little known, mostly found in collections of connoisseurs, where they awaken the admiration of all who see them for the first time.

FLASHLIGHT. A very large, globular, medium compact to loose bloom of Japanese type. First impression, a crimson-pink with golden center. According to color chart, the predominating color is tyrian rose; guards have light streak, center clear. The center is amber yellow, shading pink at base. \$2.00 each; \$20.00 per dozen.

GOLDMINE. Japanese type. Flat, loose, medium size. Guards tyrian rose, center same as guards, tipped golden yellow. Medium tall, erect variety of good habit. Mid-season. \$2.00 each; \$20.00 per dozen.

THE BLACK PEONY

MONS. MARTIN CAHUZAC. (Dessert). The nearest to black of any Peony to my knowledge. A very rich dark purple garnet, with black reflex. A medium sized, globular, semi-rose type flower. Very strong, vigorous grower, medium height, free bloomer, very dark green foliage with red stems. Early mid-season. A very distinct and handsome variety. Highly recommended. \$2.00 each.

Garden Accessories

DAHLIA CUTTING KNIFE

Many of my customers have asked me what kind of a knife I use to separate my dahlia tubers, so I have decided to offer the type of knife I use for sale to my customers, to make it convenient for them in separating their dahlia clumps. The above illustration shows its general appearance. The blades are very strong and long, pointed so that you can work them in among thickly rooted clumps. It is 2½ inches long, made of finest tool steel. They are ground sharp and hand-honed. Every blade is securely riveted into the handle, and secured in addition to the strong rivet by nickel-plated closed-end ferrules. This knife has an oval taper rubberoid handle, making it easy to grip and giving it resistance to slipping in your hand. In addition to being useful to separate dahlia clumps, it is an ideal knife for Grape picking, and pruning purposes, having excellent steel in its point for a great distance. A good pruning knife is always handy. **75c each postpaid, 3 for \$2.00.**

This rare ornamental tree makes one of the most beautiful specimen trees available for lawn plantings, as individual specimens. They have the most beautiful double flowers, and greatly exceed

one's expectation. **JAPANESE FLOWERING CHERRY**

PRUNUS AVIUM ALBA-PLENA. Double Flowered White Cherries. A handsome decorative tree with charming double white flowers. 5 to 6 feet, \$4.00 each; 4 to 5 feet, \$3.00 each.

PRUNUS SUBHIRELLA. A very floriferous Japanese tree with pale pink flowers of great beauty. 4 to 5 feet, \$4.00 each.

PRUNUS SUBHIRELLA ROSEA PENDULA. Weeping Japanese Cherry. Exceptionally decorative form, grown on tall, straight stem, from the top of which the slender branches sweep in a broad umbrella-like head. The flowers are various shades of bright pink. 5 to 6 feet, \$6.00 each.

JAPANESE MAPLE

ACER PALMATUM ATRO-PURPUREUM. Blood-leaved Japanese Maple. One of the rarest and most desired lawn trees. Very striking in the Spring, when its leaves are blood red; later as the season advances they change to dark purple, retaining this attractive color thruout the season. 3 feet, \$9.00 each; 2½ feet tall, \$7.50 each; 2 feet tall, \$6.00 each; 18 inches high, \$4.00 each.

Vines and Climbing Plants

Vines are the gardener's greatest aid in covering up mistakes and concealing ignorance in planning or constructing anything from a garage to a spite fence. They also mitigate the harshness of Nature, throwing a mantle of beauty over dead trees, unsightly rocks, or rough banks, but they have a more definite, positive use, as well. They enhance the beauty of a wall of brick or stucco or stone and provide the only excuse for the lattice trellises and garden arbors which are so abundant in suburban areas. They are good-natured, sheltering, friendly plants and ought to be used generously wherever there is need for shade and comfort.

BIGNONIA

BIGNONIA RADICANS. *Trumpet Creeper.* 30 ft. A hardy, high-climbing plant, with large, trumpet-shaped flowers of glowing orange-red in August. 50c each, 3 for \$1.25, 2 yr. plants, 25c each.

CLEMATIS

CLEMATIS

CLEMATIS PANICULATA. *Sweet Autumn Clematis.* 20 ft. By far the best of the fall-blooming species. It thrives best in sunny situations, and will stand severe pruning in winter. A luxuriant grower and profuse bloomer with fine foliage. The flowers are medium-sized, pure white, very fragrant, and are borne in great profusion in late summer and autumn. 4 yr. plants, 75c, 3 for \$2.00; 2 yr. plants, 35c each, 3 for \$1.00.

LONICERA

LONICERA JAPONICA HALLIANA. *Hall Japanese Honeysuckle.* 26 ft. A vigorous grower with fragrant yellow and white flowers from mid-summer until frost. This makes a good ground-cover. 4 yr. plants, 50c each; 2 yr. plants, 35c each, 3 for \$1.00.

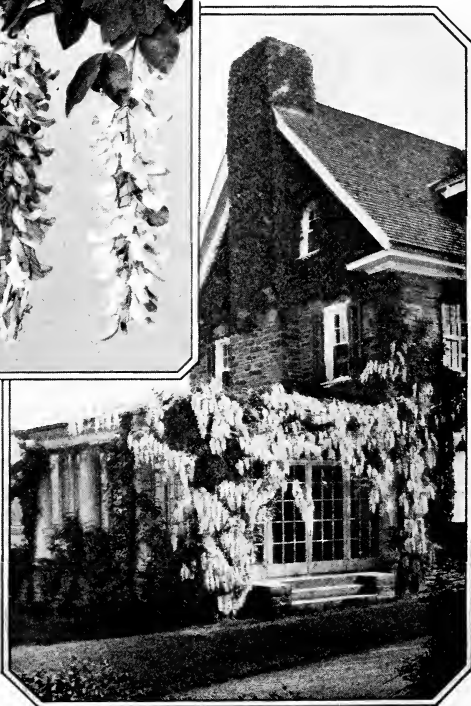

MEXICAN LOVE VINE

ANTIGONON LEPTOPUS. Mexican Love Vine or Queen's Wreath. A beautiful perennial vine, with sprays of glowing pink flowers all Summer. The vine dies in the Winter and comes up again from the root in the Spring. The roots should be protected with a mulch of straw or rotted leaves during the Winter. Always plant on the south side of the house. This is one of the most beautiful climbers grown. 35c each, 3 for \$1.00 postpaid.

WISTARIA

WISTARIA CHINENSIS (Chinese Wistaria.) (See illustration.) May and August. The most popular variety. Flowers in pale blue pendulous clusters. \$1.50 each, 3 for \$4.00.
